

50+ Telematics Parameters | Driver + Telematics Data Correlation | OBD/TCU Device types | Powered by AI & backed by Analytics

Remote driver safety monitoring and driver behavior analytics on Cloud

- After event analytics on DMS alerts
- Vehicle telematics data analytics
- Driver behavior analysis using OBD data

Real-time cognitive monitoring of driver/ occupant using vision & telematics data on NVIDIA board:

- Intelligent system to monitor, automate, analyze, and manage alerts for driver
- Integrated cloud analytics platform for remote driver safety monitoring

Automatic real-time monitoring of driver using camera feeds

- Driver scoring
- Driver drowsiness detection
- Attentiveness warning
